Response to Election

Applicant's election with traverse of Group I Species A, Claims 63-87 in the reply filed on 7-9-2004 is acknowledged. The traversal is on the ground(s) that the apparatus produces the result of the method and visa versa. This is not found persuasive because as per the restriction there are four separate method species and four separate apparatus claims using four different apparatuses of methods.

Species A generating an image using a frequency

Species B generating an image with a calculated difference relating to time.

Species C generating an image with a calculated difference.

Species D generating an image using a plurality of selected frequencies.

An apparatus that generates an image using a single frequency cannot perform the method of generating an image based on a calculated difference of frequencies since there is no capacity to perform such a task.

The requirement is still deemed proper and is therefore made FINAL.

Allowable Subject Matter

Claims 63-87 are allowed.
